

Top 10 Indoor Water Saving Tips

1. **Upgrade Old Toilets.** If your toilet was installed before 1994, replace that water waste with a WaterSense® labeled toilet.
2. **Upgrade Appliances.** Replace older washing machines with water-efficient models.
3. **Slow It Down.** Replace older high volume showerheads and faucet aerators with newer water-efficient ones.
4. **Turn It Off.** By turning off the faucet while brushing teeth or shaving, you can save about three gallons of water a minute.
5. **Shorter Showers.** If you can keep your shower under five minutes, you can save about 30 gallons of water a day.
6. **Quick Fix.** Check for leaks, especially in your toilet tank and fix as soon as possible.
7. **Fill 'Em Up.** Only run dishwashers and washing machines when they are fully loaded.
8. **Don't Rinse.** If you have a newer dishwasher, you may not need to rinse your dishes beforehand.
9. **Know Your Usage.** Monitor your water bill for unusually high use. A high water bill can alert you to a possible leak.
10. **Get a Check-up.** Sign up for a free Indoor Water Check-up. Go to ThorntonWater.com to find out how to sign up today or call 720-977-6600.
